PROFILE SUMMARY

SAP ABAP Developer with hands-on experience in **OOP ABAP, ALV, custom Z-developments, and SAP Data Dictionary**, supported by a strong background in full-stack web development. Actively transitioning into **S/4HANA-oriented development**, with practical exposure to **SAPUI5, OData (mock services), and SAP BTP fundamentals**. Passionate about writing clean, optimized code and contributing to real-world SAP implementations.

SKILLS

SAP & ABAP: ABAP, OOP ABAP, Reports, Internal Tables, ALV (Grid/List), Data Dictionary (Tables, Structures), BAPIs, BADIs, Enhancements, Performance Optimization, Function Modules, File Handling

SAP UI & Platform: SAPUI5, XML Views, OData (Mock Server), SAP Fiori Guidelines, SAP BTP (Fundamentals)

Programming & Web: JavaScript, Python, HTML5, CSS3, React.js, Node.js, Express.js, Bootstrap

Databases & Tools: MySQL, MongoDB, Git, GitHub, Bitbucket

PROJECTS

● SAP ABAP – Employee Management System (Custom Z-Module)

Technologies: ABAP, OOP ABAP, ALV, SAP GUI

Developed a custom HR management Z-application using ABAP with full CRUD functionality to manage employee and department data. Designed and implemented custom database tables such as **ZEMPLOYEE** and **ZDEPARTMENT** using the SAP Data Dictionary. Built interactive **ALV Grid reports** for real-time visualization of employee records and applied **OOP ABAP events** to trigger alerts when predefined salary threshold conditions were exceeded. Implemented robust validation logic using function modules to ensure accurate, consistent, and reliable data entry across the application.

● E-commerce Website for Fashion Retail

Developed a fully functional eCommerce platform for a fashion retail business. The website allows users to browse, search, and purchase products, with an integrated shopping cart, secure payment processing, and an admin dashboard for managing inventory.

Technologies Used:

HTML5, CSS3, JavaScript, React, Node.js, Express.js, MongoDB, Stripe API, AWS S3, Docker

Responsibilities:

Designed and implemented the front-end using React to create a responsive, intuitive user interface optimised for mobile and desktop.

Key Points:

Front-End and User Experience: Emphasise how you optimised the UI/UX for better engagement (React, CSS3, responsive design)

● SAP ABAP – Employee Management System (Custom Z-Module)Description

Technologies: SAPUI5, XML Views, OData Mock Server

Developed a beginner-friendly Fiori-style leave request application using SAPUI5 with a fully responsive design aligned to the SAP Fiori guidelines. The app included a master-detail layout to display and manage employee leave data, supported by a mock OData backend that enabled CRUD operations for testing and demonstration. The project provided a realistic simulation of a Fiori application environment, helping to understand UI5 components, data binding, and app structure without requiring a live SAP backend.

EXPERIENCE

Junior Web Developer – Smart Solutions | Nov 2024 – Present

Developed and maintained responsive web interfaces using **React.js and Bootstrap**, ensuring cross-browser compatibility and mobile-first design. Contributed to **UI optimization and performance improvements** by refactoring components, reducing unnecessary re-renders, and improving page load times. Worked on **backend integration using Node.js and PHP**, including API development and data handling. Integrated **Zoho services** for lead management and form submissions, and collaborated with designers and backend teams to deliver user-facing features aligned with business requirements.

GO-AI Associate – Amazon | Oct 2023 – Apr 2024

Maintained high accuracy in data processing and validation

Followed strict quality and compliance standards

EDUCATION

B.Tech in Computer Science and engineering -2023

Malla Reddy College of engineering, Hyderabad.

Intermediate (MPC)-2019

Gautami junior College Hydearabad
